

Suggested Areas :

- Innovative Remote Sensing applications for Land, Water, Agriculture, Urban Management
- GIS-based Smart City & Infrastructure Solutions
- GPS-enabled Navigation, Tracking & Asset Monitoring Models
- Digital Twin, IoT & Sensor-integrated Geospatial Systems
- Drone/UAV Mapping, Photogrammetry & LiDAR Applications
- GeoAI & Machine Learning for Earth Analytics and Decision Support
- Environmental Monitoring & Disaster Management Solutions

Key Benefits for Students :

- Certificates for all shortlisted participants
- Attractive prizes, medals and recognitions
- Opportunity for Internships / Project Work at KRSAC for selected students
- Interaction with Government, Industry & Academic Experts

Technologies for Managing Planet Earth

Remote Sensing, Drones, GPS, GIS & GeoAI

29th & 30th
April 2026

STATE-LEVEL EXHIBITION & STUDENT INNOVATION MODEL COMPETITION

Organized by

Karnataka State Remote Sensing Applications Centre
Department of Personnel & Administrative Reforms
(e-Governance), Government of Karnataka

Student Participation Guidelines :

- Teams may consist of max. 3 students, with one faculty (optional).
- Exhibits / Models must be aligned with the theme and focus areas of the exhibition.
- Exhibits may be working models, functional prototypes, digital demonstrations, or conceptual models.
- Projects will be evaluated based on innovation, technical relevance, feasibility, scalability, and societal impact.
- Certificates of Participation will be issued to all shortlisted teams.
- KRSAC reserves the right to modify guidelines, schedules, and evaluation procedures, and all decisions of the jury shall be final.

Competition Structure :

Team may consist of max. 3 students :

- **Phase-1:** Online submission of Concept Notes
- **Phase-2:** Shortlisting of Top 30 teams
- **Phase-3:** Final presentation and demonstration of exhibits / working models / prototypes during the exhibition at KRSAC

Final presentations and evaluations will be conducted on the afternoon of April 29, 2026, and continued on April 30, 2026.

About KRSAC :

The Government of Karnataka has been a pioneer in leveraging geospatial technologies such as Satellite Remote Sensing, Drones, GPS, GIS, GPS, IoT and GeoAI for evidence-based planning, informed decision-making, monitoring, management, and technology-enabled governance. The Karnataka State Remote Sensing Applications Centre (KRSAC), functioning as an autonomous organization under the Department of Personnel and Administrative Reforms (e-Governance), Government of Karnataka, serves as the Nodal Agency for Geoinformatics in the State.

Over the last four decades, KRSAC has developed a wide range of geospatial databases, thematic maps, analytics platforms, and decision-support systems, which have empowered State departments to improve planning efficiency, optimize resource utilization, enhance disaster preparedness, and strengthen citizen service delivery. KRSAC also offers a two-year, full-time M.Tech. programme in Geoinformatics, approved by AICTE and affiliated to VTU, to equip students with advanced skills for careers in geospatial technologies, GeoAI, UAV mapping, and digital governance.

Title of the Theme :

“Technologies for Managing Planet Earth : Remote Sensing, Drones, GPS, GIS & GeoAI”

Dates & Venue

29th & 30th April 2026

KRSAC, Doora Samvedi

Bhavan, Major Sandeep

Unnikrishnan Road, Doddabettahalli,

Vidyaranyapura Post, Bengaluru – 560097

Scan QR Code Venue

Goals of the Exhibition :

- Enable students to experience Earth observation technologies, not just learn them theoretically
- Showcase real-world applications implemented by Government and industry
- Highlight future career pathways in geospatial technologies, GeoAI, UAVs, satellite remote sensing and digital governance
- Motivate students to pursue higher studies and careers in Geoinformatics and Other Emerging Technologies

Eligibility for Participation:

- 2nd 3rd and 4th Year Undergraduate Engineering Students
- All Engineering Branches
- Interdisciplinary team participation is strongly encouraged
